Abstract (Basic): DE 3040580 A

The service counter is intended for accepting payments and orders in a public service office. It is suitable also for handing-out goods against payment or vouchers. There are a number of features which can be used independently or in combination with each other. The counter has apertures for receiving money or appropriate vouchers, as well as apertures for handing-out purchased or rented, goods.

The counter includes a system for testing and recording money or appropriate vouchers, as well as collecting containers for the same.

There is included an automated system for back-pay of money or issue of credit notes, as well as for issue of receipts. The counter may include a system for recording required services, coupled with issue of work etc. directing notes. It can also include a recording system for finished work with possible indication of interferences and delays. The system may be switched to manual operation.

Title Terms: AUTOMATIC; SERVICE; COUNTER; ORDER; MONEY; RECEPTION; GOODS;
